### EOC Update

September 2, 2021

#### **White Rock Lake fire update @ 12:30 PM**

Way' Members,

The White Rock Lake wildfire is estimated at 83,342 hectares. There have been no further significant fire growths since the planned burns on Aug 30th. Containment and mop of planned ignition area on Irish Creek North Flank expected by Sept 5th. Structural protection equipment and personnel will continue demobilizing equipment and personnel out of community.

MOTI danger tree assessment and removal is still ongoing along Westside Road currently and we are waiting for MOTI to declare the road safe. We will be moving towards a phased approach for return into community and once Evacuation orders and Alerts are rescinded in the coming days, the OKIB EOC will begin to stand down and the recovery management team will begin their work.
