K61884 Fire update #2 July 29 1700 hrs

OKIB EOC Update

Map last updated 1700 hrs

Way' Members:

The white rock lake fire, which the OKIB Emergency Operations Center has been keeping an eye on has remained relatively consistent throughout the day. The fire crews, which were mentioned in the earlier update, have gained an additional 15 support staff and an additional 2 helicopters, including one of the largest helicopters in the fleet, the Skycrane. Wildfire crews are still looking to continue to allocate more resources towards this fire.

Guards continue to be created along the Salmon River FSR and George Road to the South. BC Wildfire is quite confident that they will be able to set up an anchor point, which would allow crews to have a base of attack on the fire.

The weather patterns continue to change towards this weekend, which will result in increased fire activity. BC Wildfire is currently updating their mapping, which should better allow them to predict which direction the fire will be traveling and allocate crews and resources appropriately.

The OKIB EOC will continue to monitor the status of the White Rock Lake fire and provide the community with updates as they come in.

Limlemt/Thank you
