

Okanagan Indian Band Community Flu Clinics

COVID-19 and Flu Season

The COVID-19 pandemic has made it more important than ever to get immunized against the flu, especially during this time of the COVID-19 pandemic.

If you start to feel unwell, it can be hard to determine if you are sick because of the flu virus or the COVID-19, because the flu and COVID-19 have some of the same symptoms.

Although both of these viruses can make you feel very sick, the flu vaccination will protect you from Influenza.

It is possible to have concurrent infections of Influenza and COVID-19 which are different viruses of different families. To avoid this, it is highly recommended to have your annual flu shot.

Influenza vaccines are the best way to prevent the flu and are free to all First Nations/Aboriginal Peoples.

Attend one of OKIB's Drop In Community Flu Clinics to receive your FREE Flu Vaccination.

Flu shots will be provided on a first come first serve order.
